A Network of 17 Warehousing Locations Across the U.S.

[illegible]

Partnering with our customers in a coordinated inventory planning approach has protected the uninterrupted supply of our customers' needs as we constantly adapt to counter the changes in procurement challenges. For established companies that choose to partner with us as their supplier, Ark Safety always provides aggressive warehousing inventory levels of the products they use day-in and day-out. We make sure that these are stored at their most convenient warehousing location within our network. We forecast far in advance and cushion usage to anticipate not only average usage, but also account for trends in peak

consumption of busy seasons and anticipate unexpected increases due to upticks in production and hiring.

The inventory management team at Ark Safety goes above and beyond to not just supply quality products at competitive pricing, we take the time to truly understand the operations and buying trends of our customers. Whether you are an established customer with dedicated inventory ready to ship same-day, or you're new to Ark Safety, responsiveness and fast turnaround time is always the goal.

In addition to the warehouses we utilize, Ark Safety also drop-ships directly from manufacturers, adding an additional avenue to get you the products you need quickly. Knowing that our customers are navigating endless supply chain challenges to operate within their unique industries, we take great pride in knowing that the steady continuation of safety products is not a concern they've needed to tackle.

If we are not handling your current needs, we'd be honored to partner with you for the first time. If we are currently your safety supplier, thank you so much for the opportunity to keep your people safe!
